SUMMARY

I recently completed my FSc and learned web development, specializing in the MERN stack and AWS EC2, API handling, PostgreSQL, and Redis. With 1.5 years of learning and 6+ months of professional experience, I completed a POS application and a file conversion tool. I also developed clones of WhatsApp Web, QuillBot. I am still working on a new multinational project. I'm continuing to explore AI and cutting-edge tools to enhance my skills.

SKILLS

PROGRAMMING LANGUAGES

- javascript (node js)
- python

MARK UP LANGUAGE

- HTML

STYLING

- CSS
- Bootstrap

DATABASES

NO SQL

- Mongo DB
- Mongoose (MongoDB ODM)
- Redis

SQL

- My SQL
- PostgreSQL

FRAMEWORKS

- Express JS
- Node JS (Native)
- React JS
- Bootstrap
- Jquery
- Redux

DEPLOYMENT

- AWS (EC2, S3)
- Heroku
- Netlify
- Vercel

API

- REST

OTHERS TECH. & TOOLS

- Socket.io (real-time communication)
- Git & GitHub
- EJS
- NPM
- Stripe
- Twilio
- Postman
- Slack

WORKING EXPERIENCE

SOFTWARE HOUSE

Bano Qabil
